MAP's Mission :

To increase access to medications for solid organ transplant patients who reside in the State of Georgia.

General Objectives of MAP :

- **Increase transplant recipients' adherence to medication therapy**
- **Promote awareness of medication assistance programs available to Georgia's solid organ healthcare professionals and transplant patients (e.g., kidney, liver, heart, lung, pancreas, and/or intestines).**

What We Do:

Educate patients and healthcare professionals regarding the availability of medication assistance programs and assist in the enrollment of patients in appropriate programs.
